Upgrade your open time

So you can get more done, more precisely – for longer.

Upgrading your open time means having longer to apply tiles. Whether you are tiling a wall or a floor, you can apply your adhesive to a larger area – fixing more tiles – without fear of the adhesive skinning over quickly and needing to be reapplied. You can fix with all the precision you need, because tile adjustment is easier.

With no need to rush, no need to cut corners, having a full half-hour of open time means fixing more tiles and finishing faster.

BAL Rapidset Flexible Fibre has an open-time 3x longer than most other rapidset adhesives.

30
minutes
open
time

Upgrade your working time

Spend more time working and less time mixing – with less waste.

Doubling your working time allows you to carry on fixing when other tilers have to stop. Knowing that your adhesive will not 'go off' too quickly in the bucket stops you losing adhesive (and money) through waste and lets you mix bigger batches with confidence. As well as saving on waste, less stopping and starting during your day simply means you are more productive.

Whether you choose to do more jobs per week, or just enjoy finishing the job sooner that day – upgrading to 60 minutes of working time allows you to fix more tiles per mix and fix more tiles per hour.

BAL Rapidset Flexible Fibre has a working time 2x longer than most other rapidset adhesives.

60
minutes
working
time

Upgrade your work life

Fix more tiles, finish fixing earlier – then grout just as quickly.

Extending your open time to 30 minutes is great and doubling your working time to 60 minutes is terrific. Still being able to grout after only three hours makes this an unbeatable upgrade! Mix bigger batches with less waste, spend longer tiling and less time mixing, but keep all the benefits of a rapid setting adhesive.

BAL Rapidset Flexible Fibre is the only tile adhesive that allow you more open time, more working time and superfast grouting. Great tiling, completed sooner. There has never been a better upgrade.

New FST powered Rapidset Flexible Fibre tile adhesive

The rapid setting
adhesive everybody
is talking about.

We all love a free upgrade, so telling everyone is only natural. A full 30 minutes of open time and double the usual working time would be great, but still being able to grout after just three hours is astonishing. This is an adhesive upgrade like no other, so you can proudly tell everybody about it.

When you tell people about your fabulous free upgrade, remember to mention all the other benefits. Like everything from BAL, it has a 25-year guarantee. You can use it with almost any tile type, including porcelain. And, new Fibre Strand Technology means unbelievable performance.

It would be wrong to keep this to yourself.

Free upgrade for everyone!

Best in the
industry

There is a full 25-year guarantee with everything bearing the BAL name – a guarantee that we proudly publish for all to see. Nobody else has a guarantee that good. Nobody else puts it in writing.

Tried, tested
and proven

Porcelain tiles have low water absorption, so they need special treatment. You only see the Porcel-Bond Plus mark on an adhesive developed for use with porcelain. Take no chances with anything else.

Innovation that
never stops

FST is the sign of unbelievable adhesive performance. It shows that BAL continue to lead in innovation, after more than 50 years at the top. All FST adhesives have been specially developed using technology to combine the use of certain microfibres with high-quality smooth fillers to ensure unparalleled strength and flexibility – even with extended open times – as well as providing the ultimate consistency and ease-of-application.
