

Achieving your design dreams

Bringing your build visions to reality

Creating the buildings of the future, that will to be admired for generations, requires both vision and expertise.

BAL have over 50 years market-leading experience as the trusted partner for tiling projects to provide a full range of system solutions for tiling projects.

With continued innovation development our product solutions ensure your vision can be achieved and built to last.

Specifying the right products can be a complex process, demanding exact answers to complex questions.

But with BAL you do not need to be a tiling expert to specify correctly every time. We provide a range of specification support services to help you specify your tiling project with confidence, from our free M40 specification writing service to online tools, technical help and on-site project support.

In BAL you can call on a company with over 50 years of heritage supporting architects, specifiers and contractors.

BAL's specification team have many years' experience solving specification challenges. Understanding your needs, processes and procedures, they know why you insist on getting things right.

➤ Free Technical Advisory Service (TAS)

Whatever your query the BAL Technical Advisory (TAS) is here to help. We provide free assistance and advice for all tiling projects. Whether you need assistance on a particularly complex install, or are simply looking for product advice, our market-leading expert team are always on call.

➤ RIBA-approved CPDs

BAL's comprehensive family of architect-specific seminars are all fully RIBA-accredited for architects' and specifiers annual CPD requirement. Designed with specifiers and architects in mind, BAL CPDs will help you understand all the technical aspects of tiling to ensure that your knowledge is fully up-to-date for high quality designs that last the test of time.

➤ Sample testing

Choosing the right tiles and adhesives for a specific location or background is vitally important during the specification process, particularly when specifying new construction materials or tile types. By understanding the technical aspects of the tiles, substrates and environment, our laboratory can identify and recommend the correct products in advance to avoid potential failures.

Sample testing is available on request, certain conditions may apply. Speak to our Specification Support Team for more information.

➤ On-site project support

Supporting our Specification Team and Technical Advisory Service is our nationwide team of Product Support Technicians (PSTs). BAL PSTs are experienced tiling professionals and are always ready to visit your project and give practical, experienced-based consultations. Our PSTs can also provide on-site training in the use of our specified product for subcontractors working on your project.

➤ 25-year guarantee

All BAL products are supplied with a 25-year guarantee. By using a BAL system solution for tiling you can be confident of no product failures.
