Luxury tiling in a demanding environment

Featuring stunning tiling throughout in a demanding environment, including electric and water-fed underfloor heating systems, the new Brimstone Spa complex at the Langdale Estate Hotel in Cumbria oozes elegance and sophistication.

The 990m² development includes 10 treatment rooms, seven thermal experiences including a Himalayan salt steam grotto, an outdoor sauna, and a heated relaxation infinity pool that spans from indoor to outdoor.

The stunning complex also features a number of relaxation areas, a spa deli and a private spa suite for two, among other facilities.

Contemporary in style, Brimstone Spa offers a luxury, sensory experience with tiles types, textures, colours and matching grouts inspired by the surrounding Lake District landscape including striking bronze metallic ceramic throughout the thermal areas, wood effect porcelain in the floor areas and stunning mosaic work in the relaxation areas and infinity pool.

BAL worked extensively with project architects Unwin Jones and Ceramtek from design to completion including a full written M40 tiling specification, specification support from BAL's Specification Support Team and on-site support from BAL's Product Support Technicians.

As a result, BAL tile adhesives, grouts, sealants and preparation products – including waterproofing and levelling – were all supplied for phase three of the £4.5 million project.

With changes in humidity and temperature the project required a range of specialist products to cope with additional movement from thermal changes including; BAL Level Max levelling compound, BAL Single Part Flexible tile adhesive and BAL Stone & Tile PTB tile adhesives.

BAL Micromax2 anti-mould grout, with colour-matched BAL Micromax sealant, was specified throughout the project and is also specifically formulated with increased flexibility to cope in all environments including showers, wet rooms and heated floors.

This project is highly revered and was short-listed in The Tile Association Awards 2017 for Best Use of Tile in Leisure or Hospitality.

Hero products

- BAL Level Max
- BAL Easypoxy AG
- BAL Tank-it
- BAL Micromax2

Trust BAL to get it right

Whatever the environment and brief, whatever tile type or sizes to be installed, BAL has the right tiling solutions for the task.
