

SAFETY DATA SHEET BAL SINGLE PART FASTFLEX WHITE

SECTION 1: Identification of the substance/mixture and of the company/undertaking	
1.1. Product identifier	
Product name	BAL SINGLE PART FASTFLEX WHITE
1.2. Relevant identified uses of the substance or mixture and uses advised against	
Identified uses	Cement based adhesive.
Uses advised against	No specific uses advised against are identified.
1.3. Details of the supplier of the safety data sheet	
Supplier	Building Adhesives Ltd Longton Road, Trentham, Stoke on Trent ST4 8JB 01782 591100
Contact person	sdsreply@building-adhesives.com
1.4. Emergency telephone nu	
Emergency telephone	01865 407 333 (24hr)
SECTION 2: Hazards identified	cation
2.1. Classification of the subs	tance or mixture
Classification (EC 1272/2008)	
Physical hazards	Not Classified
Health hazards	Skin Irrit. 2 - H315 Eye Dam. 1 - H318 Skin Sens. 1 - H317 STOT SE 3 - H335
Environmental hazards	Not Classified
Human health	When the cement based powder is mixed with water or admixture, a strongly alkaline paste is produced. Cement based products may, until set, cause both irritant and allergic contact dermatitis. Irritrant contact dermatitis is due to a combination of the wetness, alkalinity and abrasiveness of the constituent materials. Allergic contact dermatitis is caused mainly by the sensitivity of the individual's skin to hexavalent chromium salts. Corrosive. Prolonged contact causes serious eye and tissue damage.
Environmental	The product is not expected to be hazardous to the environment.
2.2. Label elements	
Pictogram	

Signal word

Hazard statements	H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H335 May cause respiratory irritation.
Precautionary statements	 P102 Keep out of reach of children. P261 Avoid breathing dust. P280 Wear protective gloves/ protective clothing/ eye protection/ face protection. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P501 Dispose of contents/ container in accordance with local regulations.
Contains	ORDINARY PORTLAND CEMENT, HYDRATED LIME

2.3. Other hazards

SECTION 3: Composition/information on ingredients

The full text for all hazard statements is displayed in Section 16.

Composition comments	Contains OPC with a CrVI level below 2ppm.

4.1. Description of first aid measures

SECTION 4: First aid measures

4.1. Description of hist and measures	
General information	Consult a physician for specific advice.
Inhalation	Move affected person to fresh air at once. Rinse nose and mouth with water. Get medical attention if any discomfort continues.
Ingestion	Never give anything by mouth to an unconscious person. Do not induce vomiting. Rinse mouth thoroughly with water. Get medical attention immediately.
Skin contact	Remove affected person from source of contamination. Remove contaminated clothing. Wash skin thoroughly with soap and water. Get medical attention if irritation persists after washing.
Eye contact	Remove affected person from source of contamination. Do not rub eye. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes. Get medical attention immediately. Continue to rinse.

4.2. Most important symptoms and effects, both acute and delayed	
Inhalation	Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases.
Ingestion	May cause chemical burns in mouth and throat.
Skin contact	May cause serious chemical burns to the skin.
Eye contact	May cause severe eye irritation. May cause blurred vision and serious eye damage.
4.3. Indication of any immedia	te medical attention and special treatment needed
Notes for the doctor	No specific recommendations. If in doubt, get medical attention promptly.
SECTION 5: Firefighting measures	
5.1. Extinguishing media	
Suitable extinguishing media	The product is not flammable. Use fire-extinguishing media suitable for the surrounding fire.
5.2. Special hazards arising fr	om the substance or mixture
Specific hazards	May form explosive mixture with air at very high concentration.
Hazardous combustion products	Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours. Oxides of carbon.
5.3. Advice for firefighters	
Protective actions during firefighting	No specific firefighting precautions known.
Special protective equipment for firefighters	Wear chemical protective suit.
SECTION 6: Accidental release	se measures
SECTION 6: Accidental release	se measures tective equipment and emergency procedures
SECTION 6: Accidental release	
SECTION 6: Accidental releas	tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet.
SECTION 6: Accidental releas 6.1. Personal precautions, pro Personal precautions	tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet.
SECTION 6: Accidental releas 6.1. Personal precautions, pro Personal precautions 6.2. Environmental precaution	tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet. <u>s</u> Do not discharge into drains or watercourses or onto the ground.
SECTION 6: Accidental release 6.1. Personal precautions, pro Personal precautions 6.2. Environmental precaution Environmental precautions	tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet. <u>s</u> Do not discharge into drains or watercourses or onto the ground.
SECTION 6: Accidental release 6.1. Personal precautions, pro Personal precautions 6.2. Environmental precautions Environmental precautions 6.3. Methods and material for	 tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet. S Do not discharge into drains or watercourses or onto the ground. containment and cleaning up Avoid contact with skin or inhalation of spillage, dust or vapour. Dampen spillage with water. Absorb in vermiculite, dry sand or earth and place into containers. Avoid the spillage or runoff entering drains, sewers or watercourses. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water.
SECTION 6: Accidental release 6.1. Personal precautions, propersonal precautions 6.2. Environmental precautions 6.3. Methods and material for Methods for cleaning up	 tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet. S Do not discharge into drains or watercourses or onto the ground. containment and cleaning up Avoid contact with skin or inhalation of spillage, dust or vapour. Dampen spillage with water. Absorb in vermiculite, dry sand or earth and place into containers. Avoid the spillage or runoff entering drains, sewers or watercourses. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water.
SECTION 6: Accidental release 6.1. Personal precautions, pro Personal precautions 6.2. Environmental precautions 6.3. Methods and material for Methods for cleaning up 6.4. Reference to other section	tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet. 5 Do not discharge into drains or watercourses or onto the ground. containment and cleaning up Avoid contact with skin or inhalation of spillage, dust or vapour. Dampen spillage with water. Absorb in vermiculite, dry sand or earth and place into containers. Avoid the spillage or runoff entering drains, sewers or watercourses. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water. Ms Wear protective clothing as described in Section 8 of this safety data sheet.
SECTION 6: Accidental release 6.1. Personal precautions, pro Personal precautions 6.2. Environmental precautions 6.3. Methods and material for Methods for cleaning up 6.4. Reference to other section Reference to other sections	tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet. s Do not discharge into drains or watercourses or onto the ground. containment and cleaning up Avoid contact with skin or inhalation of spillage, dust or vapour. Dampen spillage with water. Absorb in vermiculite, dry sand or earth and place into containers. Avoid the spillage or runoff entering drains, sewers or watercourses. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water. ns Wear protective clothing as described in Section 8 of this safety data sheet.
SECTION 6: Accidental release 6.1. Personal precautions, pro- Personal precautions 6.2. Environmental precautions 6.3. Methods and material for Methods for cleaning up 6.4. Reference to other sections Reference to other sections SECTION 7: Handling and stor	tective equipment and emergency procedures Wear protective clothing as described in Section 8 of this safety data sheet. s Do not discharge into drains or watercourses or onto the ground. containment and cleaning up Avoid contact with skin or inhalation of spillage, dust or vapour. Dampen spillage with water. Absorb in vermiculite, dry sand or earth and place into containers. Avoid the spillage or runoff entering drains, sewers or watercourses. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water. ns Wear protective clothing as described in Section 8 of this safety data sheet.

Storage precautions

Store in tightly-closed, original container in a dry, cool and well-ventilated place. Keep only in the original container.

7.3. Specific end use(s)

Specific end use(s)

The identified uses for this product are detailed in Section 1.2.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters

Occupational exposure limits ORDINARY PORTLAND CEMENT

Long-term exposure limit (8-hour TWA): WEL 10 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ respirable dust

HYDRATED LIME

Long-term exposure limit (8-hour TWA): OEL 1 mg/m3 resp.dust WEL = Workplace Exposure Limit OEL = Occupational Exposure Limit.

Ingredient comments

WEL = Workplace Exposure Limits

LITHIUM CARBONATE (CAS: 554-13-2)

- Inhalation; Long term systemic effects: 10 mg/m³
- Dermal; Long term systemic effects: 64 mg/kg/day
- PNEC
- Fresh water; Intermittent release 0.9 mg/l

8.2. Exposure controls

Appropriate engineering controls	Provide adequate ventilation. Avoid inhalation of vapours. Observe any occupational exposure limits for the product or ingredients.
Eye/face protection	Wear chemical splash goggles. Personal protective equipment for eye and face protection should comply with European Standard EN166.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material.
Other skin and body protection	Wear appropriate clothing to prevent any possibility of skin contact.
Hygiene measures	Provide eyewash station. Do not smoke in work area. Wash at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. When using do not eat, drink or smoke.
Respiratory protection	If ventilation is inadequate, suitable respiratory protection must be worn. Wear a suitable dust mask. Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked.
Thermal hazards	Not applicable.

Environmental exposure controls	Avoid release to the environment.
SECTION 9: Physical and Che	emical Properties
9.1. Information on basic physical and chemical properties	
Appearance	Dusty powder.
Colour	White/off-white.
рН	pH (concentrated solution): 12-13
Solubility(ies)	Slightly soluble in water.
9.2. Other information	
SECTION 10: Stability and rea	activity
10.1. Reactivity	
Reactivity	There are no known reactivity hazards associated with this product.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures.
10.3. Possibility of hazardous	reactions
Possibility of hazardous reactions	Not applicable.
10.4. Conditions to avoid	
Conditions to avoid	Avoid contact with acids. Water, moisture.
10.5. Incompatible materials	
Materials to avoid	Strong acids. Aluminium powder
10.6. Hazardous decomposition	on products
Hazardous decomposition products	Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).
SECTION 11: Toxicological int	formation
11.1. Information on toxicologi	cal effects
Skin corrosion/irritation Skin corrosion/irritation	
	Severe skin irritation.
Extreme pH	≥ 11.5
Serious eye damage/irritation Serious eye damage/irritation	Causes serious eye damage.
Respiratory sensitisation Respiratory sensitisation	Not known.
Skin sensitisation	
Skin sensitisation	May cause sensitisation or allergic reactions in sensitive individuals.
Germ cell mutagenicity	
Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Genotoxicity - in vivo	Based on available data the classification criteria are not met.

Carcinogenicity		
Carcinogenicity	Based on available data the classification criteria are not met.	
Reproductive toxicity		
Reproductive toxicity - fertility		
Specific target organ toxicity - STOT - single exposure	single exposure Based on available data the classification criteria are not met.	
Specific target organ toxicity -		
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.	
Aspiration hazard		
Aspiration hazard	Not relevant.	
Inhalation	May cause respiratory system irritation. May cause damage to mucous membranes in nose, throat, lungs and bronchial system. Harmful: danger of serious damage to health by prolonged exposure through inhalation.	
Ingestion	Ingestion may cause severe irritation of the mouth, the oesophagus and the gastrointestinal tract.	
Skin contact	The product contains a small amount of sensitising substance. May cause sensitisation or allergic reactions in sensitive individuals.	
Eye contact	Risk of serious damage to eyes. May cause chemical eye burns.	
Acute and chronic health hazards	Repeated exposure in excess of the WEL has been linked with rhinitis and coughing. Skin exposure has been linked to allergic chromium dermatitis.	
SECTION 12: Ecological Information		
SECTION 12: Ecological Infor	mation	
SECTION 12: Ecological Infor	mation The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms.	
-	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic	
Ecotoxicity	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic	
Ecotoxicity <u>12.1. Toxicity</u>	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances.	
Ecotoxicity 12.1. Toxicity Toxicity	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances.	
Ecotoxicity <u>12.1. Toxicity</u> Toxicity <u>12.2. Persistence and degrad</u>	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances. ability Not relevant. After hardening, cement presents no toxicity risks. There are no data on the degradability of this product.	
Ecotoxicity <u>12.1. Toxicity</u> Toxicity <u>12.2. Persistence and degrad</u> Persistence and degradability	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances. ability Not relevant. After hardening, cement presents no toxicity risks. There are no data on the degradability of this product.	
Ecotoxicity <u>12.1. Toxicity</u> Toxicity <u>12.2. Persistence and degrad</u> Persistence and degradability <u>12.3. Bioaccumulative potentian</u>	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances. ability Not relevant. After hardening, cement presents no toxicity risks. There are no data on the degradability of this product.	
Ecotoxicity <u>12.1. Toxicity</u> Toxicity <u>12.2. Persistence and degrad</u> Persistence and degradability <u>12.3. Bioaccumulative potential</u> Bioaccumulative potential	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances. ability Not relevant. After hardening, cement presents no toxicity risks. There are no data on the degradability of this product.	
Ecotoxicity 12.1. Toxicity Toxicity 12.2. Persistence and degrad Persistence and degradability 12.3. Bioaccumulative potential Bioaccumulative potential 12.4. Mobility in soil	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances. ability Not relevant. After hardening, cement presents no toxicity risks. There are no data on the degradability of this product. al No data available on bioaccumulation. The product is non-volatile. The product is insoluble in water and will sediment in water systems.	
Ecotoxicity <u>12.1. Toxicity</u> Toxicity <u>12.2. Persistence and degrad</u> Persistence and degradability <u>12.3. Bioaccumulative potential</u> Bioaccumulative potential <u>12.4. Mobility in soil</u> Mobility	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances. ability Not relevant. After hardening, cement presents no toxicity risks. There are no data on the degradability of this product. al No data available on bioaccumulation. The product is non-volatile. The product is insoluble in water and will sediment in water systems.	
Ecotoxicity <u>12.1. Toxicity</u> Toxicity <u>12.2. Persistence and degrad</u> Persistence and degradability <u>12.3. Bioaccumulative potential</u> Bioaccumulative potential <u>12.4. Mobility in soil</u> Mobility <u>12.5. Results of PBT and vPv</u> Results of PBT and vPvB	The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. The product is not expected to be hazardous to the environment (LC50 aquatic toxicity rating not determined). The addition of cement based product to water will, however, cause the pH to rise and may, therefore, be toxic to aquatic life in some circumstances. ability Not relevant. After hardening, cement presents no toxicity risks. There are no data on the degradability of this product. al No data available on bioaccumulation. The product is non-volatile. The product is insoluble in water and will sediment in water systems. B assessment	

SECTION 13: Disposal considerations

13.1. Waste treatment methods **Disposal methods** Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. Product that contains >2ppm CrVI should be disposed of according to local legislation or should be treated with a reducing agent before use. Product that is within shelf life may be hydrated with water and disposed of according to local legislation. The hydrated product is not hazardous.

SECTION 14: Transport information

General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).
Road transport notes	Not classified.
Rail transport notes	Not classified.
Sea transport notes	Not classified.
Air transport notes	Not classified.
14.1. UN number	
Not applicable.	
14.2. UN proper shipping nan	
Not applicable.	
14.3. Transport hazard class(es)
Not applicable.	
Transport labels No transport warning sign rec	juired.
14.4. Packing group	
Not applicable.	
14.5. Environmental hazards	
Environmentally hazardous so No.	ubstance/marine pollutant
14.6. Special precautions for	user
Not applicable.	
14.7. Transport in bulk accord	ling to Annex II of MARPOL and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code	Not applicable.
SECTION 15: Regulatory info	rmation
15.1. Safety, health and envir	onmental regulations/legislation specific for the substance or mixture
Notional regulations	The Chamicals (Herend Information and Deckering for Swenky) Decylations 2000 (CL2000

National regulations

The Chemicals (Hazard Information and Packaging for Supply) Regulations 2009 (SI 2009 No. 716).

Guidance

Workplace Exposure Limits EH40. CHIP for everyone HSG228. Safety Data Sheets for Substances and Preparations. Approved Classification and Labelling Guide (Sixth edition) L131.

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information	
Devision commente	
Revision comments	
Issued by	Technical Manager
Revision date	24/11/2017
Hazard statements in full	H315 Causes skin irritation.
	H317 May cause an allergic skin reaction.
	H318 Causes serious eye damage.
	H335 May cause respiratory irritation.
