BALtiling

BAL Micromax2

Developed as a result of extensive R&D carried out in collaboration with tilers nationwide, BAL Micromax2 offers a combination of previously unseen properties to make it ideal for virtually any wall or floor installation.

Its versatility removes the need for different grouts within a single installation: as BAL Micromax2 suits both the floors and the walls.

Superfine, consistent, strong, flexible, the world's first genuinely universal grout, it can be used for grout joints as narrow as 1mm and as wide as 20mm with no slumping, shrinking and cracking.

Smooth, fine, consistent, versatile with in-built anti-mould and anti-mildew protection, it sets within 2-3 hours for fast track tiling completion.

Now available in 20 striking shades to match or complement any tile or colour scheme, it also comes with a range of colour-matched silicone sealants (excluding Vivid Views).

Other grout ranges are available. See reverse for details.

Microban®

BAL is the exclusive UK partner of Microban®, global leader for antimicrobial protection products. The Microban® technology is in-built to the grout formulation so it will never wash off or wear away.

This offers unrivalled protection for safe, long-lasting anti-fungal solutions capable of resisting unsightly mould growth, guaranteed for 10 years.

WITHOUT PROTECTION

Mould can grow on and around the grout.

WITH MICROBAN® ANTIMICROBIAL PROTECTION

Anti-fungal protection and an absence of mould demonstrating the effectiveness of Microban®.

Microban® is a registered trademark of Microban Products Company.
