

## BAL Rapid-Flex One

Control to rely on for any tile installation. Longer open and working times and in one white colour with FST and S1 performance.

## Guaranteed Performance

BAL Rapid-Flex One is covered by our 25-Year Written Guarantee – this means you can trust our products to be free from manufacturing defects and to be fit for use when used correctly as per our instructions and technical data and good working practice.

With our 25-Year Written Guarantee there is no confusion – it's one guarantee for all our internal-use products – whether used for domestic or commercial purposes!

With BAL Rapid-Flex One you're not just tiling, you're installing certainty!

## You're installing value

BAL provides multiple award-winning products, industry-firsts and trademarked technologies. This means BAL products provide better, long-lasting results for clients – with easier, more efficient and faster installations for you.

More than that – when you install BAL, you are also installing as part of our team. Call for leading technical guidance, project support and the latest industry standards. Get nationwide technical support in-the-field with free training, site-tests and immediate problem-solving and advice.

Then, relax. Your work is guaranteed with a 25-year BAL warranty – now just cash-in through GivBax Rewards.

You're not just installing the BAL product in the bag or bucket – but everything else that BAL provides too.

## Full System Solution

Whatever the project, BAL can provide a full system for tiling including:

- Waterproofing
- Levelling
- Preparation – including uncoupling
- Adhesives
- Grouts
- Sealants
- External Tiling Systems

# You're installing certainty.

# The one choice for a rapid-set with more time to mix and fix, you're installing certainty.

## With BAL Rapid-Flex One, you're installing the easiest to use rapid-set adhesive.

Available in white only, the adhesive is suitable for use with all tile types, even 3m x 1m large format panels, making it the universal choice for all jobs.

For certainty when installing you keep control with 3x longer open time and 2x longer working time than other rapid-set adhesives meaning while you get the same fast-set to grout after 3 hours, you can do full bag mixes and time to fix with no waste.

**BAL Rapid-Flex One** provides major advantages over traditional rapid-set adhesives:

- ✓ White in colour – suitable for all tile types including ceramic, porcelain and most natural stone
- ✓ Suitable for large format panels, even 3m x 1m panels
- ✓ Extended Pot Life of 60 minutes
- ✓ Extended Open Time of 30 minutes
- ✓ Grout in 3 hours
- ✓ S1 deformability
- ✓ Fibre Strand Technology (FST) for improved flexibility and strength
- ✓ Highly polymer modified – perfect for underfloor heating and areas of limited movement
- ✓ Smooth consistency for mixing and application

## More control for fixing

With BAL Rapid-Flex One, you're installing with certainty as you have more control on every installation. Longer open times, longer working times, time for adjustability but still able to grout quickly!

With **BAL Rapid-Flex One**, you're installing 2x longer working time (pot life) than most rapid-sets. With 60 minutes in the bucket, the adhesive will last longer when mixed. This means that you can confidently have bigger mixes for speed and suffer less waste.

**BAL Rapid-Flex One** also provides 3x longer open time than most rapid-sets. With 30 minutes open time, compared to 10-20 minutes with other comparable products, this means you can tile larger areas and adjust tiles easier and for longer, without the fear that the adhesive will skin over. This aids faster work and helps you produce perfect results!

# Let's get to it.

## Recommended for large format panels

Long open and working times means **BAL Rapid-Flex One** is perfectly suited for the installation of large format tiles and panels for example 3m x 1m. This is because it's long open time means you can spread more of the adhesive on the back of the tile and on the floor or wall without worrying that it will skin over – this compares with other rapid-sets where you can only spread 1m at a time before the adhesive skins over.

Its rapid-setting nature ensures a good bond is assured, and no moisture is trapped behind the tile, with high grab and non-slip performance thanks to FST technology.

As a versatile product available due to its white colour it is also a perfect choice for any ceramics, porcelains and most natural stones.

## Still a fast finish

With **BAL Rapid-Flex One**, you can rely on the set-time as well. Ready to grout in just three hours, you can get the job completed faster!

**BAL Rapid-Flex One** has consistent setting times – formulated and produced in the UK, with the UK climate in mind, you can trust that your tiles can be walked on and grouted after three hours. This ensures that floors in busy areas, commercial spaces and family homes can be brought back into service for customers and other trades sooner.

It's the perfect mix when a fast, quality finish is needed!

## Versatility and strength

With **BAL Rapid-Flex One**, you're installing versatility. Suitable for use internally or externally and available in white only, only one bag is needed on the job. Whether you're tiling with natural stone, ceramic or porcelain tiles – **BAL Rapid-Flex One** is the perfect adhesive!

**BAL Rapid-Flex One** is formulated with Fibre Strand Technology (FST) for improved strength and flexibility. FST combines the use of microfibres with high-quality super-smooth spherical fillers. These microfibres improve the adhesion strength, grab and non-slip characteristics, so that the performance improvement is delivered alongside extended open times.

Highly polymer modified, **BAL Rapid-Flex One** is classified with S1 deformability. Use in dry or wet areas, on highly trafficked floors, and over underfloor heating or areas with limited movement.

**BAL Rapid-Flex One** is also suitable for use in swimming pools and other areas of full immersion.
