BAL *Let's get to it.*

bal-adhesives.com

@BALtiling

BAL – a brief history

BAL was born
with the first adhesives
sold on 1st February 1963

*CTF – first cement-based
tile adhesive launched.*

*First company to deliver
CPD seminars to RIBA and
the tiling industry.*

*Building Adhesives
invested in leading
manufacturing
operations but also
in Research &
Development facilities
and support services to
lead the development
of new product
technologies and
support in the UK.*

*BAL leads with new
technology, particularly
new ready-mix
adhesives first launched
in this decade.*

*BAL launches first
epoxy grouts into the
UK tiling industry.*

*Building Adhesives
became the first
adhesive manufacturer
to open a specialist
training centre for
standards and fixing
techniques.*

*BAL launches UK's
first anti-microbial
wall and floor grouts.*

*As part of BAL's adhesive
revolution, new high-yield
technologies were launched
with the BAL Supercover range
as well as the world's first
adhesive with a controllable
set time; BAL Variset XP.*

*BAL Fibre Strand Technology
products introduced for
improved performance, unique
uncoupling systems requiring
less adhesive and market-
leading grout technology.*

*BAL launched Tilerworld.com
– the first website allowing
homeowners to find a trusted
tiler and a platform for tilers
to create free website and
business promotion, receive
leads directly, use a free quote
building tool, have the latest
industry news and be part of
an industry forum community.*

**Pioneering digital tools
to support end users
continue to be launched with
the multiple award-winning
GivBax Rewards providing
cash-back to end users
for every BAL product
purchased.**

1960s	1970s	1980s	1990s	2000s	2010s	2020s+

The 60's saw much larger
increases in tile usage, changing
substrates and trends.

Most tile fixers were still using
a traditional cement:sand mix
first introduced in the Victorian
age, with tiling still extremely
low per capita in the UK.

The UK tile market
continued to grow with
new tiles imported from
Southern-Europe also
increasingly available.

The emergence of new
markets in the Middle
East and Far East led to
a world-wide boom in
tile production.

As tiles become
increasingly popular
within the UK a demand
for better products,
complex installations and
improved workmanship
was created.

Building Adhesives becomes
part of the **ARDEX**GROUP
and continued to set high
standards in quality and
production, becoming one of the
first to obtain the triple badge
of ISO 9001, 14001 and 18001,
and becoming a key player
within the standards bodies
BS 5385, EN 12004.

While the effects of the
recession hit the construction
industries hard, BAL remained
at the forefront with a focus
on innovation and quality to
provide value for installers and
clients. Time and cost saving
technologies were launched
as well as a continued support
to training.

BAL continues to lead with a
continued focus on solutions
to provide value and support
new trends, with seven new
products already launched in
just over 2 years including
our simple solution to fixing
external tiles and slabs.

Concerned that there were no
specialist products, support or
training for tiling installation in
the UK, the British Ceramic Tile
Council (members from all
the UK tile manufacturers)
formed a new company
"**Building Adhesives Ltd**" to
specifically develop high quality
tiling adhesives, backed by
technical support and lead
standards in the UK.

As part of its constant drive
to improve UK and European
standards, Building Adhesives
supported the launch of
The Tile Association (TTA),
formed to bring the whole of
the UK wall and floor tile
industry under one roof.

BAL also became a proud
partner of Cool Earth –
saving an area of rainforest
equivalent to more than all
the professional
football pitches
in the UK,
and growing!

COOL
EARTH

Working through the COVID-19
pandemic – BAL lead with its
award-winning 'Back Stronger'
campaign to ensure all
members of the UK tiling
community could communicate
and get support throughout the
lockdown periods and beyond.

Using global resources and
solutions with ARDEX Group,
and our expertise as
market-leaders in the UK
for 60 years, BAL continues to
innovate with continued
award-winning products,
training and support services.

With BAL, you're installing value

BAL is market-leader in tiling, providing award-winning products and industry firsts

Since launching in 1963, innovation after innovation has followed – from the first specialist cement-based tile adhesives, to the first epoxy grouts in the UK as well as anti-microbial wall and floor grouts.

Fibre Strand Technology (FST) and the introduction of the first lightweight, thin uncoupling mat system, variable setting-adhesives, fast-track systems and still we keep innovating – for example our new tile adhesive and uncoupling system in one!

It's not the numerous awards we have proudly won for such innovations – but our focus on solutions that make it easier and faster to install perfection, to reduce installation steps and ultimately let you create tiling to make you proud.

With BAL you're not just installing the BAL products in the bag or bottle, you're everything else that BAL provides too!

By your side with on-site support

As a tiler you don't just need quality, easy-to-use products, it is also useful to have someone to turn to for installation or product advice.

We add value with our Training and Technical Support Team – who can provide comprehensive technical advice and support – both on-site or on the phone.

Our team consists of nine Technical Managers who cover the entirety of the UK from the Shetlands to the Scilly Isles.

With more than 250 years of trade and industry experience combined, the majority of the team are ex-installers themselves, so they are perfectly placed to provide any advice needed.

As well as being able to offer advice and product recommendations on the phone or online, the highly-experienced team can also attend your site – offering site assessments and product specific training or advice.

We also offer other onsite tests and services including:

- **FREE** Carbide Bomb and Hygrometer Moisture Tests to determine the moisture content of screeds
- **FREE** BRE Screed Tests
- **FREE** Sample Testing Service of new backgrounds and tiles

Contents

You're installing the perfect start.

Level Max

Longer pot life, for easier installs and avoiding waste. Ready to tile in 4 hours at any depth up to 80mm, with no need to prime.

BAL Level Max

A high-performance, thick-bed leveller with Fibre Strand Technology (FST).

FIXERS FAVOURITE

5 POINTS £0.50

25kg

View product information

Perfect for use in almost any internal installation. Suitable for deep applications and ready for tiling in 4 hours at any depth.

SUBSTRATES: **Can go on timber (min. 3mm) for tiling use tile backer board, concrete, screeds, underfloor heating.**

POT LIFE AT 20°C: **30 minutes**	WALKABLE: **After 3 hours**
TILE AFTER: **After 4 hours**	COVERAGE: **~5m² at 3mm depth**
CLASSIFICATION: **Exceeds BS EN 13813 CT – C20 – F7**	COLOUR: **Grey only**

✓ Bed Depth: 2–80mm in one application
✓ Self-smoothing, low shrinkage, pumpable, protein-free
✓ No priming required once cured, with a smooth dust-free surface

BAL Level Fast

An extremely fast-setting levelling compound to allow fast-track tiling.

4 POINTS £0.40

20kg

View product information

Allows tiling after just 45 minutes for rapid project completion. Developed with Fibre Strand Technology for added strength and flexibility.

SUBSTRATES: Concrete, sand:cement screeds, overlaid timber, underfloor heating.

POT LIFE AT 20°C: **10 minutes**	WALKABLE: **After 30 minutes**
TILE AFTER: **After 45 minutes**	COVERAGE: **4m² at 3mm**
CLASSIFICATION: **Exceeds BS EN 13813 CT – C30 – F7**	COLOUR: **Grey only**

✓ Bed Depth: 2–30mm
✓ Wet Edge Time: 10 minutes
✓ No spike rolling needed, self-smoothing, self-healing, low shrinkage

BAL Level Plus (with water)

Mixed with water for all standard levelling installations. *Can be enhanced with* **BAL Level Plus Liquid** *(right).*

3 POINTS £0.30

20kg

View product information

Use with water for standard applications over substrates such as concrete, sand:cement or anhydrite screeds or tile adhesive residues.

SUBSTRATES: One Part: Concrete, sand:cement, anhydrite, tile adhesive residues.

POT LIFE AT 20°C: **30 minutes**	WALKABLE: **After 2 hours**
TILE AFTER: **2–3 hours**	COVERAGE: **4m²**
CLASSIFICATION: **CT – C20 – F6**	COLOUR: **Grey only**

✓ Bed Depth: 2–12mm (1-part)
✓ Wet Edge Time: 15 minutes
✓ Add BAL Course Aggregate for depths up to 30mm

BAL Level Plus Liquid

Latex additive to be added only to BAL Level Plus (powder) for ultimate 2-part levelling performance.

2 POINTS £0.20

4.5L

View product information

Perfect for use over problematic substrates such as bitumen adhesive residues, underfloor heating, or glazed and thermoplastic vinyl tiles.

SUBSTRATES: Two Part: bitumen adhesives residues, underfloor heating, glazed tiles, thermoplastic vinyl tiles, tile backer board.

POT LIFE AT 20°C: **30 minutes**	WALKABLE: **After 2 hours**
TILE AFTER: **2–3 hours**	COVERAGE: **4m²**
CLASSIFICATION: **CT – C20 – F7**	

✓ Bed Depth: 2–10mm (2-part)
✓ Add BAL Course Aggregate for depths up to 30mm
✓ Great flow and self-healing

You're installing value.

BAL provides multiple award-winning products, industry-firsts and trademarked technologies. This means BAL products provide better, long-lasting results for clients – with easier, more efficient and faster installations for you.

More than that – when you install BAL, you are also installing as part of our team. Call for leading technical guidance, project support and the latest industry standards. Get nationwide technical support in-the-field with free training, site-tests and immediate problem-solving and advice. Then, relax. Your work is guaranteed with a 25-year BAL warranty – now just cash-in through GivBax Rewards.

You're not just installing the BAL product in the bag or bucket – but everything else that BAL provides too.

BAL Board

A lightweight, magnesium oxide tile backer board designed for internal wall and floor tiling.

FIXERS FAVOURITE

2 POINTS £0.20

View product information

It offers superior strength, water and mould resistance, and is easy to cut and install without specialist tools.

USE FOR: **Providing a stable substrate for tiling.**	
WEIGHT TOLERANCE: **Up to 100kg/m²**	COMPATIBLE WITH: **Tiles, stone, mosaics, emulsion and oil-based paints and wallpaper, plaster and render applications**
MAY BE TILED: **Immediately, once securely fixed and rigid**	
SIZE: **6mm or 12mm thick, 1200x600mm**	

✓ Alternative to plasterboard and timber when fixing tiles
✓ Simple, easy to handle, fix and with dust free cutting
✓ Provides a strong and stable surface for finishes

BAL Quickset Cement

A fast-setting cement for use in screeds and renders.

7 POINTS £0.70

20kg

View product information

Allows for rapid tiling and reduced downtime on site. Pumpable for quick installation.

USE FOR: **Internal and external applications, for screeds, patch repairs, bedding**	
WORKING TIME AT 20°C: **60 minutes**	WALKABLE: **After 3 hours**
TILE AFTER: **4 hours (bonded screeds), 48 hours (un-bonded or floating screeds)**	COVERAGE: **Up to 1m² at 50mm thickness for a screed.**
	COLOUR: **Grey**

✓ Rapid-strength
✓ 80% less shrinkage than OPC cement
✓ Tile in 4 hours compared to 3 weeks

BAL Quickset Render

Fast-setting pre-blended preparation render for walls prior to tiling.

4 POINTS £0.40

25kg

View product information

Polymer-modified pre-blended cement/sand mix.

USE FOR: **Internal and external applications, for screeds, patch repairs, bedding**	
POT LIFE AT 20°C: **30 minutes**	WALKABLE: **After 3 hours**
SET TIME: **2 hours**	COVERAGE: **up to 5.3m² at 3mm thickness**
CLASSIFICATION: **CT – C40 – F7**	COLOUR: **Grey**

✓ Get your backgrounds prepared faster and easier
✓ Tile in 2 hours compared to 2-3 days for traditional renders
✓ Use over concrete, brickwork, plaster and blockwork

You're installing peace of mind.

Waterproof 1C

The fastest, easiest, one-coat ready-mixed waterproofer with EAD certification.

BAL Waterproof 1C

A ready-to-use, EAD-approved one-part waterproofing system for walls and floors in wet areas.

FIXERS FAVOURITE

18 POINTS £1.80

5L

View product information

Provides a flexible, seamless waterproof barrier with Fibre Strand Technology.

USE FOR: **Interior applications including showers, bathrooms and wet rooms.**

TYPE:
One-part ready mixed

COVERAGE:
Up to 6m² per tub

TILE AFTER:
2 hours

COLOUR:
Grey

CLASSIFICATION:
ETA-24/1129

✓ Joint bridging up to 3mm
✓ Low VOC, 40% recycled content
✓ Easy and cost effective, one-coat waterproofing

BAL Primer 1C

A rapid-drying acrylic primer for walls and floors prior to the application of BAL Waterproof 1C.

2 POINTS £0.20
1L

View product information

Stabilises dusty surfaces and reduces porosity prior to the use of BAL Waterproof 1C tanking system.

SUBSTRATES: **Use on plaster, porous screeds and renders, fibre cement boards, BAL Board (tiling side) before waterproofing.**

APPLICATION: **Undiluted**	COVERAGE: **Up to 6m²**
DRYING TIME: **15–30 minutes**	COLOUR: **Red**

PACK SIZE: **1Ltr**

Priming is only required on plaster, cement boards and BAL Board (tiling side). Here, one coat neat of BAL Primer 1C must be used, allowing to dry for 15-30 minutes before applying BAL Waterproof 1C

BAL Waterproof 1C Tape

For reinforcing corners and junctions as part of a waterproof system using BAL Waterproof 1C.

View product information

Must be used when waterproofing as part of an EAD-approved waterproofing system.

USE FOR: **Reinforcing corners and junctions prior to application of BAL Waterproof 1C**

SIZE: **100mm x 5m roll**	COLOUR: **White**

✓ Suitable for domestic and commercial use, for internal applications in wet environments
✓ Part of an EAD waterproofing system, prior to tiling

BAL Waterproof 1C Matting

Matting for reinforcing pipework and wet-room floors prior to tiling.

View product information

Should be used when installing BAL Waterproof 1C as part of a EAD-certified system for NHBC tanking requirements.

USE FOR: **Reinforcing pipework and wet room floors prior to application of BAL Waterproof 1C**

SIZE: **1m x 1m**	COLOUR: **White**

See page 31 for BAL Universal Adhesive & Sealant information

✓ Suitable for domestic and commercial use, for internal applications in wet environments
✓ Part of an EAD waterproofing system, prior to tiling

Primers Overview

Primers, bonding agents, and admixtures are essential in tiling to ensure durability and adhesion.

Primers are applied to porous or dusty substrates before tiling to seal surfaces and improve grip for adhesives. Primers also reduce porosity of substrates, which improves the performance of levellers and tile adhesives.

Bonding agents, often latex based, are used to improve the strength, flexibility, and adhesion of cementitious mixes like mortars, screeds, and renders.

Admixtures are liquid additives blended into cement-based adhesives or grouts to improve flexibility, water resistance, and strength—ideal for areas exposed to moisture or movement, such as bathrooms, kitchens, and exterior installations.

BAL Prime APD

A rapid-drying acrylic primer for walls and floors, stabilising dusty surfaces and reducing porosity.

FIXERS FAVOURITE

5 POINTS £0.50
2.5L

View product information

Suitable for both internal and external environments.

USE FOR: **preparing floor and wall backgrounds prior to fixing of ceramic/mosaic and natural stone tiles.**

SUBSTRATES: **Plaster, tile backer board, tongue & groove, anhydrite, cement:sand screeds and render.**

APPLICATION: **Undiluted or diluted depending on substrate**	DRYING TIME: **15–30 minutes**

✓ Perfect for priming walls and floors prior to tiling
✓ Easy to apply, bluey-green in colour

BAL Bond SBR

A synthetic polymer primer and admixture used to enhance mortars and prepare backgrounds for tiling.

3 POINTS £0.30
1L

10 POINTS £1.00
5L

View product information

Suitable for internal/external, wet/dry areas including pools. Enhances adhesion, flexibility, waterproofing and durability.

USE AS: **Bonding agent, primer, mortar additive.**

SUBSTRATES: **Timber, plaster, cement:sand screeds and render, vinyl, tile backer board, anhydrite.**

APPLICATION: **Slurry coat or primer**	DRYING TIME: **15–30 minutes**

✓ A must have for any tiler's toolkit
✓ Use as a screed bonding system for swimming pools
✓ Helps permit feather edging of repair mortars

BAL Admix AD1

A water-based polymer additive for cementitious adhesives, improving adhesion and flexibility.

7 POINTS £0.70
2.5L

10 POINTS £1.00
3.5L

View product information

Suitable for internal/external, wet/dry areas. Improves physical properties/performance of some BAL cementitious powder adhesives.

USE AS: **Admixture for wall/floor tile adhesives.**

COMPATIBLE WITH: **BAL CTF4, Rapid-Flex One, Flex One, XL Floor One, Supercover Rapidset.**

NOT SUITABLE FOR: **Highly polymer-modified adhesives or ready-mixed products**

✓ Suitable for use with porcelain tiles
✓ Dilute 1:1 or 1:3 with clean water in your adhesive mix

BAL Admix GT1

A water-based additive for cementitious grouts, enhancing flexibility and performance.

3 POINTS £0.30
1L

View product information

Suitable for internal/external, wet/dry areas. Ideal for when grouting areas with limited movement such as floating floors.

USE AS: **Admixture for wall/floor grouts.**

COMPATIBLE WITH: **BAL Grout, BAL Micromax3 ECO.**

✓ Suitable for use with porcelain tiles
✓ Dilute 1:1 with water or 1:2 with water – see Technical Data Sheet for more information
✓ Reduces staining for cementitious coloured grouts

BAL Protective Sealer

A temporary water-based protective sealer for use prior to grouting.

2 POINTS £0.20
1L

5 POINTS £0.50
2.5L

View product information

Suitable for internal/external, wet/dry areas. Designed to prevent staining of tiles and natural stone by pigmented grouts.

USE FOR: **Sealing natural stone, porcelain, and ceramic tiles prior to grouting.
Wash off during first wash of grouting process.**

DRIES IN:
15 minutes

COLOUR:
Clear

✓ Protects against any need to re-grout or re-tile due to stained tiles
✓ Helps for initial wash off and aids in removal of excess grout on tiles with textured finishes

13

SAVING YOU MONEY, TIME AND MATERIALS
JUST THE FACTS

LOWEST SYSTEM COST	FASTEST INSTALLATION	LOWEST MATERIAL WEIGHT	ONLY 4 BAGS PER 30m²
40% LOWER COST	**70%** TIME SAVING	**70%** LESS MATERIAL WEIGHT	**NO MAT** OR ADDITIONAL ADHESIVE REQUIRED

See Technical Data Sheet for full details.

BAL AF Max anti-fracture technology absorbs lateral stress movement from the floor protecting tiles from failures.

No other products needed – **just mix and fix!**

Tile Adhesive 20kg **x12** + Uncoupling Mat **30m** = BAL af max **x4**

AF Max removing the need for uncoupling mats

BAL AF Max

Unique rubber-crumb adhesive that performs as an uncoupling and fixing system in-one.

FIXERS FAVOURITE

14 POINTS £1.40

17kg

View product information

Eliminates the need for separate uncoupling mats. Ideal for problematic floors, it offers significant savings in time, cost, and materials.

SUBSTRATES: **Screeds, asphalt, bitumen, steel, T&G and plywood, existing ceramic tiles and more.**

POT LIFE AT 20°C: **45 minutes**

COVERAGE: **Up to 8.5m² – only 4 bags needed for 30m²**

GROUT AFTER: **5 hours**

COLOUR: **Grey only**

CLASSIFICATION: **BS EN 12004 C1S2**

✓ Anti-fracture technology absorbs lateral stress movement
✓ 40% lower cost and 70% time/material savings vs. traditional systems
✓ Removes the need for uncoupling mats

BAL Rapid-Mat

A thin, bonded uncoupling membrane designed for fast-track tiling on problematic floors.
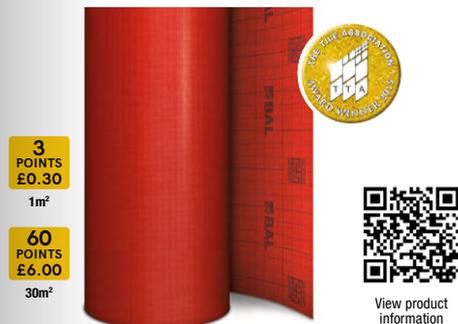

3 POINTS £0.30 1m²

60 POINTS £6.00 30m²

View product information

Reduces adhesive consumption and provides excellent protection against lateral movement and substrate stress.

SUITABLE FOR: **Ideal for heated floors, timber, and new screeds, domestic and commercial, medium/heavy duty floors – with minimal height build-up.**

SUBSTRATES: **Most problematic floor substrates including timber floors, new screeds and floors with under-tile heating systems.**

SIZE / COVERAGE: **30m² (1 x 30m)**

THICKNESS: **Less than 1mm thick**

✓ Uses 20% less adhesive than cavity mat systems
✓ Lightweight and easy to install
✓ Easy cutting, and grid-lines for setting-out
✓ Versatile for any tile type

BAL Flexbone VAried

An advanced high-load bearing bonded uncoupling membrane.

3 POINTS £0.30 1m²

40 POINTS £4.00 20m²

View product information

Designed for high-load bearing applications and substrates with limited movement, domestic and commercial.

SUITABLE FOR: **Installation of large format ceramic, porcelain, slabs and natural stone tiles with minimum edge length of 100mm.**

SUBSTRATES: **Heated screeds, new cement screeds, timber floors and existing floor surfaces. Suitable for substrates with limited movement.**

SIZE / COVERAGE: **20m² (1 x 20m)**

✓ Provides shear stress protection between tile and substrate
✓ Patented GripLock technology providing greatest adhesive strength
✓ Fully waterproof membrane

BAL Flexbone 2Easy

A unique loose-laid uncoupling mat that requires no adhesive underneath.

40 POINTS £4.00 20m²

View product information

Ideal for fast-track installations on unprepared or sensitive substrates. Perfect for rental properties, heritage sites, and retail spaces.

SUITABLE FOR: **Large-format ceramic, porcelain, natural stone, slabs with minimum edge length of 200mm.**

SUBSTRATES: **heated floors, timber, bitumen, and mixed substrates, contaminated, cracked, or stained screeds. New cement:sand screeds (when walkable), anhydrite screeds at 1.5% CM (usually 0.5% CM).**

SIZE / COVERAGE: **20m² (1 x 20m)**

✓ Truly uncoupled system – no adhesive or priming required
✓ Saves up to 2kg/m² on adhesive compared to bonded mats

Ready Mixed Tile Adhesives

Ready-mixed tile adhesives are convenient, pre-mixed pastes designed for quick and easy wall tiling. They dry through evaporation rather than a chemical reaction, meaning they require good air circulation to dry effectively.

Ideal for fixing ceramic tiles (or some small porcelain tiles) to interior walls, they work best on absorbent surfaces like plaster or plasterboard.

Perfect for kitchens, bathrooms, and utility areas, these adhesives are suitable for small to medium tiles in dry or lightly damp environments.

They eliminate the need for mixing, ensuring consistent quality and smooth application.

However, they are not recommended for floors, heavy or large tiles, or areas with prolonged water exposure, such as wet rooms or power-showers

For speed and simplicity, ready-mixed adhesives are a reliable choice for everyday tiling projects.

BAL White Star Plus

A highly flexible, non-slip wall tile adhesive with Fibre Strand Technology. Light-weight rheology for easier and faster application.

FIXERS FAVOURITE

Epoxy Grouts

Epoxy grouts are high-performance, resin-based grouts known for exceptional strength, durability, and chemical resistance.

Unlike cement-based grouts, they are impervious to water, stains, and harsh cleaning agents, making them ideal for demanding environments such as pools, spas and wet rooms.

Epoxy grouts provide a smooth, hygienic finish that resists cracking and discolouration, ensuring long-lasting results.

Commonly used in commercial kitchens, food processing areas, laboratories, and wet rooms, they are perfect for spaces requiring superior hygiene and chemical protection.

While sometimes more difficult to apply than cementitious grouts, their unmatched performance makes them the go-to choice for heavy-duty and moisture-prone installations.

BAL Absolute Grout

When you need a hygienic and chemically resistant waterproof grout and adhesive, choose BAL Absolute Grout.

FIXERS FAVOURITE

6 POINTS £0.60
2kg

View product information

An easy-to-apply and easy-to-clean three-part epoxy grout and adhesive where a hygienic, durable, abrasion-resistant, waterproof finish is required.

✓ Can be over-painted with BAL Waterproof 1C tanking system

Simple installation onto Concrete or Type 1 MOT

Easy fixing with just 3 BAL External Range Products!

20mm porcelain tile/paver/stone

Concrete / Type 1 MOT

Slurry primer is only needed when bonding bedding mortar onto a concrete base.

BAL EXTERNAL priming slurry bond — Flexible Slurry Primer to Bond External Pavers and Tiles — grey 20kg

BAL EXTERNAL terrace grout — High Performance Flexible Joint Compound for External Pavers and Tiles — beige 10kg

BAL EXTERNAL bedding mortar — Pre-blended Cement and Graded Fillers to Provide a Mortar Bed — grey 25kg — exterior

Installation onto Concrete (perfect condition for tiling)

A simple installation with just a maximum of 2 BAL External Range products, plus a suitable BAL tile adhesive!

External porcelain tile/paver/stone

Concrete substrate*

Optional – if the concrete substrate is already fully suitable for direct tiling BAL Level Out is not required.

BAL xl floor one — Semi-Rapid Setting, Flexible PTB Adhesive — white 20kg

BAL EXTERNAL terrace grout — High Performance Flexible Joint Compound for External Pavers and Tiles — beige 10kg

BAL EXTERNAL level out — Fast Setting External Levelling Compound — grey 25kg — exterior

BAL XL Floor One

If tiling direct onto concrete/leveller, a suitable BAL external tile adhesive with thicker bed depths can be used.

* If the concrete is in sound condition with required falls – but does require some inconsistencies on the concrete surface to be removed BAL Level Out should be used. Where thicker substrate heights, provision of substrate falls, or an improved base for tiles is required, then using BAL Bedding Mortar is recommended.

BAL Level Out

Fast-setting external levelling compound.

BAL EXTERNAL level out — Fast Setting External Levelling Compound
- For smoothing rough or impact damaged concrete
- Suitable for external applications
- Fast setting – walkable after 2-3 hours
- Apply from 2mm to 20mm thick in a single application

for use on external concrete — grey 25kg — exterior

7 POINTS £0.70

25kg

FIXERS FAVOURITE

View product information

For smoothing damaged concrete bases before tiling. Pumpable and self-smoothing.

USE FOR: **Dry/wet external environments including total immersion in pools. Domestic or commercial use.**

BED DEPTH: **2–20mm**	WALKABLE: **After 2 hours**
TILE AFTER: **3 hours**	WATER REQUIREMENT: **5.25L per 25kg**
CLASSIFICATION: **Exceeds BS EN 13813 CT – C30 – F7**	COLOUR: **Grey**

✓ Water and frost resistant, 30-minute pot life
✓ No need to prime, just dampen down the surface
✓ Water content can be reduced for gradient levelling

BAL Bedding Mortar

A high-performance, pre-blended mortar.

4 POINTS £0.40

25kg

View product information

Ideal for bedding external pavers and tiles. Freeze-thaw resistant.

USE FOR: **Bedding external pavers, tiles, and natural stone. Domestic or commercial use.**	
BED DEPTH: **10mm-100mm**	WORKING TIME AT 20°C: **1 hour**
GROUT AFTER: **12 hours**	COVERAGE: **At 10mm 1.25m² per 25kg**
CLASSIFICATION: **BS 7533 compliant**	COLOUR: **Grey**

✓ Grout 12 hours sooner than traditional sand:cement mortars
✓ Pre-mixed, no measuring needed – just add water!

BAL Priming Slurry Bond

A high-strength bonding slurry for use with BAL Bedding Mortar.

4 POINTS £0.40

20kg

View product information

Ensures strong adhesion to concrete and screeds.

✓ Mixes quickly on-site with water
✓ Durable and colour-consistent finish

ARDEX Academy –
Training Courses tailored for you

Building on more than 20 years of training heritage in the tiling industry, the ARDEX Group offers several courses to tile fixers and contractors across the country.

With ever changing technologies, legislation and techniques, the ARDEX Group – with its BAL and ARDEX tiling brands – believes it is important to provide everyone with the opportunity to expand and enhance their skills and knowledge.

The ARDEX Group UK offer a full suite of single day masterclass courses providing practical and theoretical tiling training for fixers, apprentices, students, distributors and specifiers on a range of topics.

The ARDEX Group works with complementary manufacturers including wedi, Sigma, Rubi, KHR Company and many more to offer rounded training courses with training on all aspects of tiling and preparation.

We can now offer courses at both its **North and South training academies in Stoke-on-Trent and Haverhill respectively, with selective courses also available at wedi's training centre in Manchester and Sigma Academy in Portsmouth**.

Places are available to book NOW via the ARDEXAcademy Training website – ARDEXAcademy.uk

BAL's Support of Cool Earth Charity

BAL is proud to partner with Cool Earth, Europe's fastest-growing environmental charity dedicated to protecting endangered rainforests and combating climate change.

Since 2011, BAL has worked alongside Cool Earth to safeguard some of the most threatened ecosystems on the planet.

Rainforest destruction releases billions of tonnes of CO_2 annually, equivalent to the entire output of the USA, making its preservation critical in the fight against global warming.

Cool Earth takes a unique approach by empowering Indigenous communities to become legal custodians of their land, creating protective barriers against deforestation. Through community rangers and satellite monitoring, these areas remain secure from illegal logging and ranching.

To date, Cool Earth has saved over 2 million acres of rainforest, protecting 380 million trees and preventing more than 500 million tonnes of CO_2 emissions.

BAL integrates this mission into its business model: every sack of adhesive or grout sold contributes to rainforest protection. This partnership reflects BAL's commitment to sustainability across its product lifecycle and positions the company as the only UK and Ireland tile adhesive manufacturer actively supporting rainforest conservation.

Together, BAL and Cool Earth deliver real, measurable impact in tackling climate change and preserving biodiversity for future generations.
